

Inpatient Printing (Lab Labels)

Lab labels should be available to print after an order has been signed in Epic.

In Hyperspace

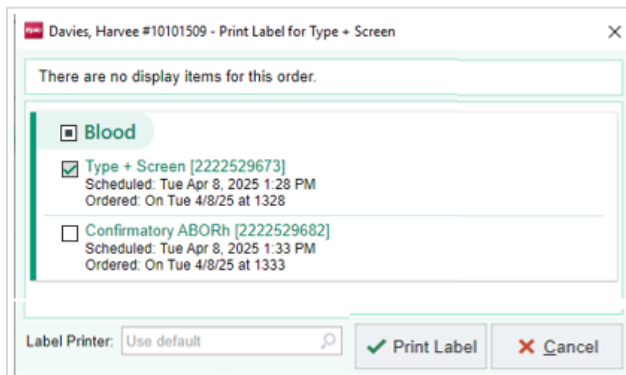

Step 1:

To print the label, go to the Brain sidebar activity while in the patient's chart and click the "Print Label" button.

Step 2:

Review the labels you would like to print and then click the "Print Label" button again in the pop-up window

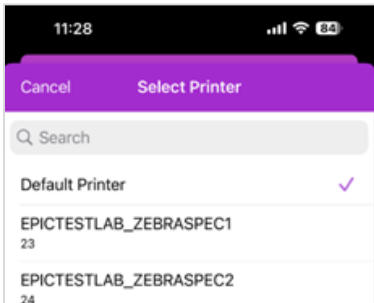

- ⚠️ You must allow the system 10-20 seconds of processing before continuing the collection task.
- ⚠️ You must remain on the same device.

In Rover

Step 1:

After logging in, the nurse will select the lab label printer they will need for their shift. If nothing is selected, they will be forced to select a printer each time they want to print.

Step 2:

If nothing is selected upon logging in for your shift, you can "Change Printer" by selecting the dropdown arrow (next to Log Out).
