Re: Important Specimen Collection Update for Lead and Lead (Maternal) Testing

Dear Valued Northwell Health Laboratories' Clients,

We would like to inform you of an important specimen collection update for Lead and Lead (Maternal) testing.

Effective October 7, 2024, the current Tan topped collection tube for Lead testing will be discontinued and replaced with a Royal Blue topped collection tube with K2 EDTA. While we will immediately implement this change, we will continue to use and accept the current Tan topped tubes until they are depleted.

Should you have any questions, please do not hesitate to reach out to our customer service team at (800)-472-5757.

Replacement Tube information

People Soft Ordering #	Description	BD Catalog #
123562	Royal Blue Blood Collection 6 mL With K2 EDTA Tube 13x100 	368381

If you have any questions, please contact Client Services at (800) 472-5757.
