Molecular Genetics Test Request Form

Laboratory Phone: 516-562-4114; Fax: 516-562-2691; Hours of Operation: M-F 6am to 6pm
NYS Civil Rights Law requires that the ordering physician obtain consent from the patient or legal guardian for Molecular Genetic study laboratory tests. Please have the patient sign the consent provided on the form or indicate that you discussed the genetic disease/s listed on this form that the patient will be tested for. (Specimen instructions on the other side)

PART I: PATIENT INFORMATION

Patient Name: _____

Med. Rec. No.: _____ Date of Birth: _____

Age: _____ Sex: _____ Address: _____

_____

PART IIIA: MOLECULAR GENETIC STUDY REQUESTED

[ ] Factor-V Leiden [ ] Prothrombin

[ ] Hemochromatosis [ ] HIBM [ ] Y microdeletion

[ ] Fragile-X [ ] HLA-B*57:01 [ ] MTHFR

[ ] Spinal Muscular Atrophy [ ] HLA-B*27 [ ] HLA-B*58:01

PART IIIB: INFORMED CONSENT

Consent: Forwarded / Retained in the office

I have received information regarding the disease(s) for which I am being tested and the necessity of the above test and hereby give my consent to perform the test(s). NO test other than those authorized shall be performed on my biological sample. The sample will be destroyed at the end of the testing or NOT more than 60 days after the sample was taken.
I also understand that a positive result may not result in disease, but increases the risk for the disease. Such a result may require genetic counseling and/or further testing and/or further physician consultation. A negative result does not rule-out increased risk for disease. The test may give false negative result due to changes not detectable by the method and/or reagents used. Results of the test(s) are provided to my physician, and anyone else who is legally authorized.

_____

PART II: PATIENT CLINICAL INFORMATION/HISTORY

Indication for test: _____

Diagnosis: _____

Date and time of specimen collected: _____

Specimen: **BM Aspirate** **BM-Bx** **Blood**
Tissue Sections **Tumor Tissue**

PB-WBC count: _____ Blast count: _____

PART IV: MOLECULAR ONCOLOGY TEST REQUESTED

[ ] B-Cell Gene Rearrangement [ ] T-Cell Gene Rearrangements

[ ] FLT3 ITD and TKD Mutation [ ] CALR [ ] MPL Mutations

[ ] Quantitative BCR/ABL t(9:22) for CML/ALL [ ] p210 [ ] p190

[ ] Quantitative JAK2 V617F Mutation

[ ] JAK2 V617F reflex to JAK2 Exon 12 Mutation Analysis

[ ] MYD88 L265P [ ] CXCR4 C1013G [ ] WM/LPL Panel

[ ] DNA & HOLD

PART V: RESIDUAL MATERIAL

I consent to having my specimen retained for greater than 60 days for the use by the laboratory for the purposes of quality control and/or training purposes. I understand this is not a DNA banking facility and there are no guarantees that a specimen will remain for future testing. If used for quality control and/or training purposes, all identifying information will be permanently stripped from the sample.
I hereby give my consent to the above.

Instructions for specimen collection, transportation and/or storage

Molecular Specimens	Tube Type	Handling and Storage Conditions
Peripheral Blood (at least 2ml)	Lavender Top (EDTA)	Room Temperature 20-25°C or refrigerate at 4°C / **DO NOT FREEZE**
Bone Marrow	Lavender Top (EDTA)	Room Temperature 20-25°C or refrigerate at 4°C / **DO NOT FREEZE**
Tissues	Cut 10 sections at 10 microns thick, place in a 1.5ml microfuge tube or on slides.	Room Temperature 20-25°C
BCR/ABL1 – Peripheral blood/Bone Marrow (at least 3 ml)	Lavender Top (EDTA)	**Refrigerate at 4°C, deliver to lab within 72 hours/ DO NOT FREEZE**
Pleural Fluid, submit at least 0.5 x10^7 cells	collected in sterile tube	Transport at 4°C
FNA, submit at least 0.5 x10^7 cells	collected in sterile tube	Transport at 4°C

Transportation: Submit all specimens to the laboratory ASAP after collection at room temperature. DO NOT EXPOSE THE SPECIMEN TO EXTREME TEMPERATURES (COLD OR HEAT) DURING TRANSPORTATION. DO NOT FREEZE THE SPECIMEN.

Specimens for BCR/ABL1 must be refrigerated at 4°C and arrive within 72 hours of collection.

Any questions? Call the laboratory at 516-562-4179
